

AUTOIMMUNITY**ANTI-PHOSPHOLIPIDE ANTIBODIES - ELISA****Anti-Cardiolipin IgA**
7800/96 Wells

Intended Use	Autoantibody Detection, Human Sera.
Label	Alkaline Phosphatase
Method	Cardiolipin EIA
Controls Included	Positive, Negative, Reference
No. Standard	5
Incubations	60 min + 30 min + 30 min/RT
Chromogene/Substrate	PMP
Feature & Benefits	Simple and Objective.
Reading	Spectrophotometric
Sample Types	Serum/Plasma
Sample Size	10 µL
Comments	In Vitro Diagnostic Use

Anti-Cardiolipin IgG
7900/96 Wells

Intended Use	Autoantibody Detection, Human Sera
Method	EIA
Controls Included	(Positive, Negative, Reference)
No. Standard	5
Incubations	60 min + 30 min + 30 min/RT
Chromogene/Substrate	PMP
Feature & Benefits	Simple and Objective
Conjugates	Alkaline Phosphatase
Reading	Spectrophotometric
Sample Types	Serum/Plasma
Sample Size	10 µL
Comments	In Vitro Diagnostic Use

Anti-Cardiolipin Total
7600/96 Wells

Intended Use	Autoantibody Detection, Human Sera.
Label	Alkaline Phosphatase
Method	Cardiolipin EIA
Controls Included	Positive, Negative, Reference
Incubations	60 min + 30 min + 30 min/RT
Chromogene/Substrate	PMP
Feature & Benefits	96 tests. Simple and Objective
Reading	Spectrophotometric
Sample Types	Serum/Plasma
Sample Size	10 µL
Comments	In Vitro Diagnostic Use
