

FOR OUTSIDE THE US AND CANADA ONLY

LIAISON[®] 

TAKE YOUR LAB TO A WHOLE NEW LEVEL

AN EASY PATH TO GREATER EFFICIENCY

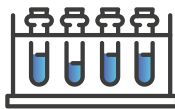

Pairing powerful yet simple diagnostics technology with high sensitivity and precision, DiaSorin makes automated chemiluminescence immunoassay (CLIA) analysis a reality for labs of all sizes.

High quality results and optimized throughput: LIAISON® XS improves your accuracy, precision, productivity and workflow

Reliable results with automatic processing: LIAISON® XS ensures complete traceability to individual tubes and fewer opportunities for human error from manual processes

Best-in-class TB testing and screening: Enhance the performance of the state-of-the-art QIAGEN® QuantiFERON®-TB Gold Plus by virtually eliminating errors and test repeats

2-hour average walkaway: Enjoy lengthy walkaway times while LIAISON® XS autonomously runs up to 85 tests an hour*

PLUG-AND-PLAY AUTOMATION

LIAISON® XS is a compact, trustworthy and fully-automated specialty immunoassay analyzer with continuous loading of samples and reagents, helping save time when resources are scarce.

Designed for low-volume specialty and routine tests, LIAISON® XS can handle up to 48 loaded tubes simultaneously. This translates to improved turnaround time, optimal cost management and straightforward integration in any laboratory.

DIASORIN: THE DIAGNOSTIC SPECIALIST

Supporting the widest range of diagnostic needs on the market, LIAISON® XS delivers the strategic innovation and exclusive immunoassays you can rely on to do more with less.

By putting your trust in DiaSorin's automated CLIA analysis and strong commitment to customer care, you benefit from the company's distinctive expertise, high-level innovation and the broadest range of specialty tests available in the immunodiagnostic market.

* Assay dependent

UNMATCHED GROWTH POTENTIAL

One essential platform: The easy-to-use LIAISON® XS analyzer meets your needs today while helping support your growth in the future.

Comprehensive specialty testing: The all-in-one solution lets your lab cost-effectively differentiate its services, supported by the added-value of QuantiFERON® T-cell technology.

Unique immunoassays: Obtain access to exclusive immunoassays that are not available on any other random access CLIA automated platform, including Infectious Diseases and COVID-19 panels.

TUBERCULOSIS IS JUST THE START
