## HEPATITIS AND RETROVIRUSES

Diagnostic solutions to optimize laboratory  
and clinical management

**DiaSorin**

The Diagnostic Specialist

# Diagnostic solutions to optimize laboratory and clinical management

## Simplified testing for viral hepatitis and retroviruses

DiaSorin is a trusted partner in prevention, treatment monitoring, and care. Our complete hepatitis & retroviruses solution ensures fast, accurate detection and screening for laboratories of any size. The high-quality diagnostic results also support treatment decisions and clinical follow-up of infected patients.

	Diagnostic challenge	The DiaSorin solution
 <b>LABORATORY</b>	High-performance assays and accuracy are key to ensuring the efficiency and prominence of the laboratory.	Reliable solution with trusted results consolidated on the fully-automated LIAISON® XL platform enables better workflow management.
 <b>CLINICIAN</b>	Accurate disease status definition is a critical aspect of informed decision-making, helping optimize patient care and treatment.	Our widest and most complete panel supports both diagnosis and disease status monitoring for more confident clinical management.
 <b>PATIENT</b>	Access to appropriate care and blocking the infection requires accurate diagnosis of the specific viral strain.	Complete and extensive menu to identify the precise viral infection.

## Easy, automated and efficient

- **Accurately** differentiate hepatitis and retroviruses infections with the widest portfolio of chemiluminescence immunoassays (CLIA)
- **Improve** laboratory efficiency and workflows by implementing a comprehensive hepatitis and retroviruses solution on the fully-automated LIAISON® XL platform
- **Optimize** transfusion-transmissible infection detection thanks to blood donor screening for HBV, HCV, HIV, HTLV, Treponema and Chagas
- **Safely select** donors with the widest validated panel for screening post-mortem organs, tissues and cells, including HBV, HCV, HDV, HEV, HIV and HTLV
- **Consolidate** the fully-automated CLIA hepatitis and retroviruses panel within our comprehensive portfolio for infectious disease diagnosis

**Prevention starts with diagnosis**

The commitment to stopping new viral hepatitis and retroviruses infections starts with the accurate and early diagnosis of infected individuals.

DiaSorin improves the prevention and treatment of both epidemics by optimizing first-line virological evaluation with a complete, fully-automated CLIA diagnostic panel.

The vast selection of high-quality assays are validated for both diagnosis and screening purposes, and designed for use with the LIAISON® XL high-performance testing system.

FAMILY OF INFECTIONS	DIAGNOSTIC ASSAYS	INTENDED USE
 HAV	 Anti-HAV HAV IgM	 Aid diagnosis
HBV	Anti-HBs HBc IgM HBeAg Anti-HBe HBsAg Quant Anti-HBc	Aid diagnosis Blood donor screening Post-mortem screening of donor organs, tissues and cells
HCV	HCV Ab	Aid diagnosis Blood donor screening
HTLV	HTLV-I/II	
HIV	HIV Ab/Ag HIV Ab/Ag HT	Aid diagnosis Post-mortem screening of donor organs, tissues and cells
HDV	Anti-HDV	
HEV	Anti-HEV IgM Anti-HEV IgG	

**The DiaSorin advantage**

DiaSorin's strong commitment to infectious disease prevention has been serving laboratories around the world for over 50 years. Today more than ever, you can trust the automated, high-quality clinical results of our unique immunodiagnostic solution for hepatitis and retroviruses detection to enhance the efficiency and productivity of any medical facility.

## Ordering Information

Target	Kit	Code
HAV	LIAISON® Anti-HAV	310170
	LIAISON® HAV IgM	310180
HBV	HBsAg Confirmatory Test	310110
	LIAISON® Anti-HBc	310130
	LIAISON® HBc IgM	310140
	LIAISON® HBeAg	310150
	LIAISON® Anti-HBe	310160
	LIAISON® XL Murex HBsAg Quant	310250
	LIAISON® XL Murex Anti-HBs	311220
	LIAISON® XL Murex Anti-HBs Plus	311230
HCV	LIAISON® XL Murex HCV Ab	310240
HDV	LIAISON® XL Murex Anti-HDV	311260
HEV	LIAISON® Murex Anti-HEV IgG	311270
	LIAISON® Murex Anti-HEV IgM	311280
HIV	LIAISON® XL Murex HIV Ab/Ag	310260
	LIAISON® XL Murex HIV Ab/Ag HT	310290
HTLV	LIAISON® XL Murex recHTLV-I/I	310270
